

Memuna Haruna

Software Engineer

I am an innovative Software Engineer with 3 years and 9 months of experience building production-level applications with Ruby/Ruby on Rails, HTML5/CSS3 and JavaScript, independently and collaboratively in agile-driven, ambitious teams. I am passionate about building creative solutions which improve people's lives.

WORK EXPERIENCE

Software Engineer

Juntos Global

02/2019 – Present

San Carlos, CA, USA (Remote)

Juntos builds warm customer relationships through mobile channels for financial services providers.

Achievements/Tasks

- Led the design and implementation of well-tested features in 3 different internal microservice applications and 2 external-facing web applications.
- Shortened sales cycle time by building a dashboard (using Ruby On Rails, PostgreSQL, HTML5/CSS3, JQuery, Coffeescript, Chart.js and D3.js.) which allowed potential customers to gain key insight into the benefits of partnering with Juntos.
- Implemented a publish-subscribe pattern between internal applications which allowed applications to seamlessly share updated data between one another.
- Interfaced with cross-functional team of business analysts, developers, designers, data analysts and quality assurance engineers to determine requirement specifications for business applications.
- Investigated and refactored slow database queries which improved application performance.

Software Engineer

Andela

05/2017 – Present

Lagos, Nigeria

Andela extends engineering teams globally with the most talented software developers in Africa

Achievements/Tasks

- Built a Ruby on Rails monolith internal application for managing the information of prospective hires in collaboration with other engineers.
- Built several applications using Reactjs, Redux, Expressjs, PostgreSQL, MongoDB, Heroku, CircleCI, and TravisCI.
- Served as a technical team lead to a team of junior engineers while they built an internal micro-blogging application.
- Provided weekly reports and led demos of internal products to concerned stakeholders such as project managers, internal clients and other engineers.
- Managed projects with tools such as Asana, Pivotal Tracker, Atlassian JIRA, and Trello.

Software Engineer

StudioHop

03/2018 – 02/2019

Dallas, TX, USA (Remote)

Provides a monthly membership to a curated list of the best fitness studios.

Achievements/Tasks

- Increased revenue generated by StudioHop by building a robust review feature into the web application (using Ruby On Rails, Reactjs, CSS3) which improved customer retention.
- Implemented a re-design of the classes and studios page of the main web application.
- Built a full-stack class scheduler feature which allowed clients to book, cancel and pay for multiple classes at once.
- Implemented clean code and testing using Rubocop and Rspec.

EDUCATION

B.Eng in Electrical and Electronics Engineering

Federal University of Technology, Minna, Nigeria

02/2010 – 12/2014
